General Specification GlucodOX® Liquid Guggul-MCT810, Type No. 211.005

**Raw material:**

Commiphora mukul - Resin

Production:

By supercritical CO2 extraction with small amount of ethanol as cosolvent, no inorganic salts, no heavy metals, no reproducible microorganisms [1]. The extract is standardised with MCT-oil, a food grade medium chain triglyceride.

D/E - ratio:

3,0 - 4,0 kg Commiphora Mukul resin to 1 kg product.

**Organoleptic
description:**

Yellow brown, clear to slightly turbid oil with weak typical smell.

Composition:

60 -65 % Commiphora Mukul resin extract
35- 40 % MCT- oil (coconut)

Ingredients:

1,9 - 2,1 % Guggulsterones analysed by HPLC, > 2,5 % sum of guggulsterols, small amount of essential oil, cembrene and mukulol (allylcembrol), less than 3 % of ethanol

Declaration:

In food supplements:

Commiphora Mukul resind extract and vegetable oil (medium-chain triglycerides from coconut)

In cosmetics:

INCI-Name: Commiphora Mukul Resin Extract, CAS-No. 93165-11-8, EINECS-No. 296-895-2 and Caprylic/Capric Glycerides, CAS-No. 73398-61-5, EINECS-No. 277-452-2

Application:

Traditional use:

In traditional Indian medicine, Commiphora Mukul resin is used against numerous diseases such as nervous disorders, muscle cramps, high blood pressure and urinary tract diseases or to treat acne [2].

In food supplements:

In food supplements the resin is used for fat burning and weight reduction, as well as for strengthening the immune system [2].

In cosmetics:

The extract has a repairing effect and is recommended for the treatment of degenerative skin symptoms and wrinkling. It has anti-inflammatory and skin strengthening properties [3]. It can also be used in products for irritated skin.

Handling:

The concentrated FLAVEX extracts are the basic ingredients for the product formulation. They are therefore not intended for direct consumption in food, nor for direct application to the skin in cosmetics, perfumery and aromatherapy. Keep away from children!
